STATISTICS OF WESTERN AUSTRALIA.

(All figures in heavy type are preliminary figures, liable to revision.)

As no data have yet become available relative to the population totals between the two Census dates of 1911 and 1921, the revision of figures prior to the 31st of March last is unavoidably held over, as also the publication of all averages, etc., dependent thereon.

I.—POPULATION AND VITAL STATISTICS.

Population of Metropolitan Area, Census 4th April, 1921, 155,129.

No. 1.—Population of Western Australia (exclusive of full-blooded Aborigines) from 1911.

Period.	Estimated Population on last day of period.			Increase during period.	Masculinity. §	Mean Population.
	Males.	Females.	Total.			
1911	168,094	126,087	294,181	17,349	14·28	286,807
1916	159,998	148,808	308,806	†9,210	3·62	314,710
1917	158,701	150,722	309,423	617	2·58	308,579
1918	161,464	151,983	313,447	4,024	3·02	311,092
1919	176,902	154,758	331,660	18,213	6·68	323,503
1920	179,067	156,491	335,558	3,898	6·73	334,034
First Quarter, 1921 <i>a</i>	176,996	155,164	332,160	...	6·57	...
Second Quarter, 1921 <i>a</i>	177,130	155,987	333,117	957	6·35	332,639
July, 1921	177,579	156,282	333,861	744	6·38	333,489

September, 1921	381	50,728	51,109	217,095	...

* In accordance with prices realised by the Australian Gold Producers' Association on the export sales of gold, the average price for each ounce (fine) of bullion for the fiscal year 1919-20 was £5.4727. On this basis the value of the gold production for 1920 may be increased to £3,381,264, with a consequent increase of the total gold production to the end of that year to £144,110,891.

a Extending from Fremantle to Midland Junction, both inclusive.

b Albany, Bunbury, and Geraldton.

c Northam and Katanning.

The index number representing the cost of these commodities in July, 1914, was 1340, for March, 1921, it was 2178; for April, 2132; for May, 2115; for June, 2081; for July, 2019; for August, 1926; and for September, 1867. As compared with July, 1914, the increase in the cost of the commodities in 1921, was:—March, 62 per cent.; April, 59 per cent.; May, 58 per cent.; June, 55 per cent.; July, 51 per cent.; August, 44 per cent.; and September, 39 per cent. Prices have been decreasing steadily since March last.

Special inquiries were made during September relative to the rents charged for houses in the outer Metropolitan suburban areas, i.e., Fremantle and Midland Junction. The result of these inquiries has caused a slight reduction in the figures representing rents in the Metropolitan Area. The ordinary returns received from house agents show that since June little variation has occurred in the rents charged. The average rent for the Metropolitan Area, as revealed by an inquiry into the rents charged for over 1,200 houses, is 19s.

a and b, See notes a and b to Table No. 39.

c Katanning only.

XIV.—WAGES.

No. 41.—Minimum* Rates of Wages fixed by Agreements and Awards in the principal Industries, under the Industrial Arbitration Act, up to 30th September, 1921.

Occupation.	Period to which Rates of Wages apply.	No. of Hours in period.	Wages.
MALES—			
Aerated Water Factory Hand	Per week	48	£ s. d. 4 0 0
Artificial Manure Worker	Per day	8	0 14 8 (basic wage)
Assembler (Agricultural Implement)	do.	13s. 6d. to 14s.

Hairdresser	do.	48	5 0 0

* It should be carefully noted that each award applies only to some particular area. The rates of wages payable on the goldfields may not be, in a few instances, fixed by any award, but the ruling rates are, for the most part, higher than those payable in coastal districts for similar occupations. In some cases private agreements, which are not yet filed at the Court, have been quoted from. † With Board and Lodging. a. Newspaper rates provided for in separate agreement, including Composing, Stereotype, and Machine Room Workers. b. Special hours.

XV.—METEOROLOGICAL STATISTICS.

No. 42.—Notes on the Rainfall of Western Australia for July, August, and September, 1921.

July.—The rainfall distribution for July plainly evidenced a continuance of the antarctic control that marked the latter half of June. Except at certain localities on the South-West Coast and along the Great Southern Railway, the totals were generally deficient, and dwindled away to vanishing point in the extreme North-East portions of the Coolgardie Goldfields.

After the first week a pronounced decline was noted in the activity of the depressions, and high pressures, with finer weather, gradually gained the ascendant over inland areas, although passing Southern depressions still affected the coast, where, in fact, very few fine days were experienced throughout the month. On the 22nd a fairly general rain was again recorded and the weather continued wet for a week, showers extending eventually, in a light fashion, to all areas South from Wallal.

Although the totals over most parts of the wheat belt were deficient compared with the averages for previous years (generally speaking between 1 and 1½ inches below), the month's rainfall must be regarded as a very satisfactory one, if the peculiarities of the season are taken into account. May and early June were excessively wet, and even in the latter half of June the rain, though light, was continuous. Under the circumstances what, from an agricultural point of view, was really required, was an abatement of the rain, and this actually occurred during the middle of the month.

August.—Owing to the dominance of high pressure systems over the inland areas, the month of August, like its predecessor, was marked by a deficiency of agricultural rains. Good falls, however, visited the wheat growing areas between the 3rd and 10th, in connection with the two storms of tropical origin, which also affected the Ashburton, Gascoyne, Murchison, and Coolgardie Goldfields, and, to a lesser extent, the De Grey. As a result most of the stations in those portions of the State showed excesses at the end of the month, in which a few of the extreme Eastern agricultural localities participated, but otherwise the agricultural districts, in spite of further showers on the 12th and again between the 19th and 21st, registered totals considerably in defect of the average.

The great majority of the coastal localities also showed shortages ranging up to 3·6 inches at Chidlow's Well. At Rottnest, however, an excess of over an inch was recorded, and a small increase was also noted at Cape Naturaliste. These excesses suggest that the tropical rain-bearing activities were by no means exhausted. Owing, however, to the pressure exerted by the inland "highs," the paths of the depressions lay much farther Westward than usual. As a matter of fact two active systems passed down the coast on the 25th and 30th, but the resultant showers scarcely crossed the Darling Range. Subsequently the storms passed across the Bight to the Eastern States, where extensive rains developed.

September.—Generally speaking the rainfall for the month of September was very close to normal in character, the tropical areas recording a perfectly dry month, while two very satisfactory general downpours visited the agricultural districts. Less rain than usual, however, reached the Gascoyne and Goldfields, while on the other hand the majority of stations along the South-West Coast registered considerable excesses. Throughout the wheat belt the totals did not differ greatly from the average values, being in some cases slightly below and in others a little above.

The two agricultural districts rainstorms referred to occurred on the 5th and 17th respectively, the former, which followed on a fortnight's dry weather, no doubt proved extremely beneficial to the crops, and its good effects were accentuated by the rains at the middle of the month. Subsequently showers were frequent on the South-West Coast, and penetrated in a very scattered fashion to agricultural localities, but although the gaugings were light, the cloudy conditions which prevailed prevented the desiccation of crops and surface soil.
